

# FRAME&FORM | ACOUSTICS

*A Canvas for Shadow, Sound, & Style*

Bring a bold new dimension to interior spaces with our Decorative Metal + Acoustic Panel System. This layered system pairs precision laser-cut metal screens with acoustic backers to *control sound in a decorative way.*

**Perfect for hospitality, workplace, and public environments where sound control meets artistic statement.**

## WHY IT MATTERS

- ✓ Acoustic Performance - Reduces ambient noise in high-traffic spaces.
- ✓ Visual Drama - Floating metal screens create dimensionality & moody shadows.
- ✓ Design Freedom - Endless combinations of metal, pattern, and finish.
- ✓ Eco-Conscious Craftsmanship - Recycled metals, powder coating, and faux finish consultation.
- ✓ Made in the USA - Designed, fabricated, and manufactured in our factory in Virginia.

## APPLICATIONS

- Feature Walls
- Ceiling Baffles
- Room Dividers
- Reception Areas
- Brand Moments

## HOW THEY ARE MADE

1

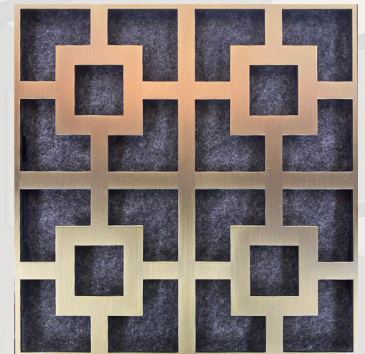

### CHOOSE YOUR SCREEN

- Geometric, organic, abstract, or custom patterns
- Laser-cut from aluminum, steel, or brass.
- Durable powder coat, faux finishes, or brushed metal options

2

### SELECT YOUR MATERIALS

- 32 standard color options of acoustic materials
- Large variety of materials to match your aesthetic
- Incorporate C.O.M. for a brand specific touch
- \*Define the shadow gap with a standard 1/2" spacing for creating depth and dramatic illusion

*\*Shadow gap visual*

**Fully assembled for easy install. Custom mounting systems available!**

# ACOUSTIC PANEL APPLICATIONS

## FEATURE WALLS

Elevate your space with an acoustic feature wall that merges aesthetics with functionality. These **custom panels reduce noise while doubling as a bold visual statement**—perfect for lobbies, lounges, or meeting areas.

You can integrate brand elements, textures, and finishes to create a refined first impression that reinforces your identity.

## ROOM DIVIDERS

**Define and divide spaces with style.** Our acoustic panel dividers bring flexibility and function to open floor plans, supporting privacy and sound control without permanent construction. Designed with mobility in mind, they can easily be moved and repositioned to suit your evolving layout needs.

Ideal for working spaces, lounges, or restaurant dining zones, these panels help shape atmosphere and improve spatial efficiency.

## CEILING BAFFLES

**Optimize acoustics without sacrificing design.**

Our custom ceiling baffles offer sound absorption in open-concept spaces such as ballrooms, dining areas, and atriums.

Available in a range of materials and finishes, these panels add architectural interest while enhancing guest comfort and clarity.
