

REPLACEMENT SHADES

Custom-Fit Shade Replacements – Without the Original Manufacturer

At Renaissance Contract Lighting & Furnishings, we specialize in what others can't—or won't do. Our in-house team in Roanoke, VA produces replacement shades for any light fixture or lamp, regardless of the original manufacturer.

Have a damaged or outdated shade? Whether you have the original specs or just the shade itself, we can recreate it to match—perfectly. Need one? Or a thousand? **We've got you covered.**

WHY CHOOSE RENAISSANCE?

✓ Made in the USA

- Faster lead times
- Lower freight costs
- No tariffs or customs hassles

✓ True Customization

We specialize in problem-solving. Need to match legacy shades in a historic renovation? Replace a discontinued item? We make it happen.

✓ Reliable Project Support

From quoting to final delivery, our team provides white-glove service, clear communication, and dependable timelines.

HOW TO MEASURE SHADES

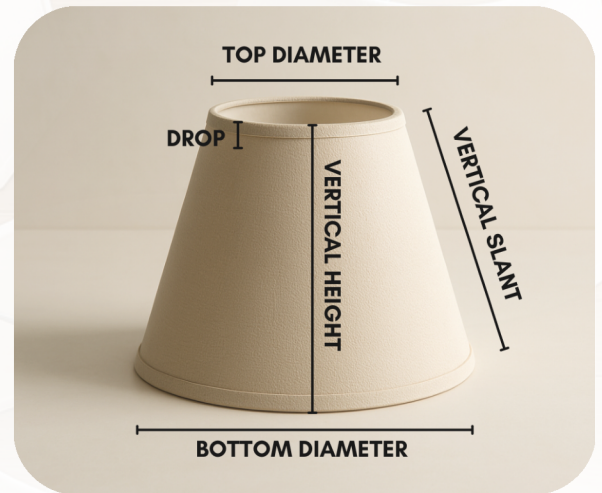

Top Diameter - Width across the top

Bottom Diameter - Width across the bottom

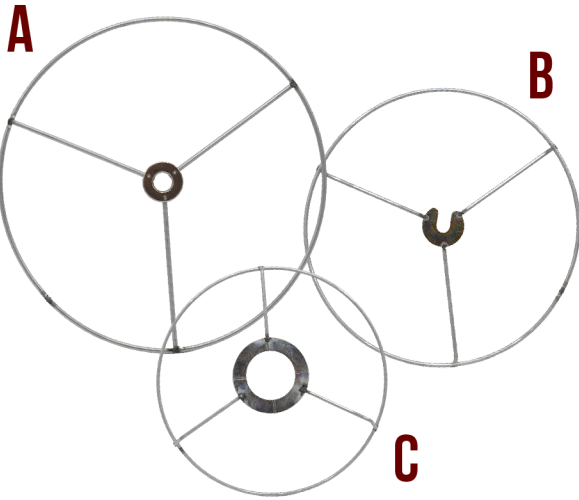

Vertical Slant - Height of the side

Vertical Height - Distance from bottom of the shade to the washer towards the top

Drop - Distance from top of the shade to the washer

WASHER TYPES

A. Standard Washer (Spider)

The most common style, designed to fit over a harp and secured with a finial. Ideal for most floor & table lamps.

B. Slip or Split Washer

Designed to slide down over the socket or clip around it—often used for pendant shades, wall sconces, or when retrofitting without removing the socket.

C. Euro / Uno Washer

A sleek washer that fits directly over a standard European-style socket with no harp required.

Custom shade washers are available upon request to accommodate unique project needs.

SHADE FRAME TYPES

We offer a wide variety of shade frame styles and sizes to suit virtually any design or fixture requirement. Our capabilities include everything from classic shapes to more complex or oversized designs, all fabricated with expert craftsmanship and attention to detail. **If you can envision it, we can likely build it.**
